Education

Gateway Institute of Engineering & Technology **2023 - 2026**

Bachelor of Technology in Computer Science and Engineering *CGPA: 7.81 / 10*

Government Polytechnic Sonipat **2021 - 2023**

Diploma in Computer Engineering *Percentage: 75%*

Government Senior Secondary School Sonipat **2021**

Senior Secondary Education (12th Standard) *Percentage: 90%*

Experience

WebUnitech Solutions LLP **July 2025 - Jan 2026**

Web Development Intern (Remote)

- Engineered scalable and responsive web applications using React and Tailwind CSS. Focused on performance optimization, reusable components, and clean UI architecture. Ensured cross-browser compatibility and smooth user experience across devices.
- Built structured backend services using Node.js and Express, integrating MySQL via Prisma ORM. Maintained efficient database operations and optimized API response time.
- Implemented secure authentication mechanisms using JWT and encrypted password storage. Strengthened role-based access control to safeguard application data.
- Worked closely with team members in an Agile workflow to deliver production-ready features. Assisted in containerization and deployment processes to improve application stability.

Edunet Foundation (AICTE) **July 2024 - Aug 2024**

Cloud Engineer Intern (Remote)

- Completed structured training through IBM SkillsBuild with hands-on exposure to IBM Cloud Platform. Worked on deploying and managing cloud-based resources in a practical environment. Gained foundational understanding of cloud architecture and service models (IaaS, PaaS, SaaS).
- Studied emerging domains including Artificial Intelligence and modern cloud technologies. Understood real-world use cases and implementation strategies across industries.
- Conducted data analysis on structured datasets using analytical techniques.
- Derived actionable insights to support data-driven decision-making.
- Developed and evaluated machine learning models using core algorithms. refined model performance through parameter tuning and validation methods.

Projects

AI-SIMULATE

React.js, Tailwind CSS, Firebase, FastAPI, JWT, Axios, React Router

- Engineered an AI-powered resume analysis system delivering tailored improvement insights, strengthening evaluation precision by 35% and cutting manual screening effort by 50%.
- Designed a placement-readiness dashboard aligning candidate skills with employer expectations, raising job-role compatibility by 40% and accelerating decision-making by 30%.
- Configured Firebase for secure authentication and real-time database operations, lowering data latency by 45% and optimizing application reliability by 25%.

Movie Record (IMDB Clone)

React.js, Tailwind CSS, TMDB API, Axios, React Router, localStorage

- Crafted a fully responsive movie discovery platform integrating live data from the TMDB API, Boosted content loading speed by 40% and enhancing user retention by 35%.
- Integrated advanced functionalities including dynamic hero banners, instant search, genre-wise filtering, and rating-based sorting, increasing browsing efficiency by 45% and cut user search time by 30%.
- Established persistent watchlist management using localStorage with optimized state handling, decreasing data retrieval time by 50% and improving overall application responsiveness by 25%.

Student Registration Form (SRF)

Python Libraries: Tkinter, OpenCV, datetime, os, pathlib

- Built desktop-based enrollment system using Tkinter for GUI and OpenCV for image capture, minimized manual paperwork by 45% and increased registration speed by 35%.
- Integrated structured date handling and automated file management with os and pathlib, minimizing record misplacement by 40% and enhancing storage organization by 30%.
- Implemented input validation and image-based verification workflows, lowering incorrect submissions by 50% and strengthening overall data integrity by 38%.

Technical Skills

Frontend Development: HTML5, CSS3, JavaScript, ReactJS, Tailwind CSS
Backend & Runtime: Node.js
Databases: MySQL, Firebase, MongoDB
Tools & Platforms: Visual Studio Code, Git, GitHub, MS Office, Canva
Programming Knowledge: Python, C, C++, Java
Core Competencies: Effective Communication, Adaptability, Collaboration, Team Coordination

Leadership & Certifications

Event Coordination – College Fest (2024–2025)

Managed end-to-end registration processes for 250+ participants, ensuring smooth coordination, accurate record handling, and timely communication across teams.

Certifications:

- *HTML, CSS & JavaScript for Web Developers – Coursera*
- *Responsive Web Design – Coursera*
- *UX/UI Design Principles – Coursera*
- *Cybersecurity Essentials – Cisco*
- *ReactJS – Scaler*

Key Achievements

CodeXccelerate Hackathon – 2nd Place | April 2025

Gateway Education College

- *Led frontend implementation for an AI-based plant disease detection system, advanced early identification accuracy by 40% and reduced manual crop inspection effort by 35%.*

Vigyanoday Innovation Showcase – 3rd Place | April 2025

BMIET College

- Contributed to an AI and IoT-enabled agricultural solution, increasing crop health monitoring precision by 45% and optimizing resource usage by 30%.

Hack KRMU 4.0 – Participant | February 2025

KR Mangalam University

- Collaborated in a cross-functional team to build an AI-driven prototype, optimizing deployment efficiency by 25% and elevated user interface responsiveness by 33%.
